

CONNECTOR FOR BOX®

ShareVault is the only full-featured virtual data room provider offering a connector for Box.

SHAREVAULT CONNECTOR FOR BOX

The **ShareVault Connector for Box** syncs files from Box to ShareVault, so you can get the best of both worlds by combining the collaborative content development tools in Box with ShareVault's leading document control and organization capabilities.

Get in touch with us for a FREE TRIAL to experience our unique integration and security features.

SINGLE PANE OF GLASS FOR ALL YOUR SENSITIVE CONTENT

ShareVault Connectors enable seamless integration with **Box, Dropbox, SharePoint, Office365 and DocuSign**. You can add multiple connectors to aggregate content from different organizations on a single "pane of glass," so that external users can

login to a single web application to securely access content from all of your various cloud-based services.

SEAMLESS INTEGRATION

The **ShareVault Connector for Box** is set up in minutes. Thereafter, any content in the synced folders is automatically kept up-to-date and has the same hierarchical structure as the folders in Box.

WHY NOT JUST USE BOX TO SHARE CONFIDENTIAL DOCUMENTS WITH OTHERS?

Box is a great choice for collaborative content development. Its rich feature set allows customers to develop best practices for document-centric collaboration.

However, for certain applications, such as due diligence and corporate governance, ShareVault's virtual data room features enhance the use of Box with superior document control options and a more intuitive and flexible hierarchical organization.

FEATURES

ShareVault was designed and built from the ground up for sharing sensitive documents, with the following capabilities:
